DETAILED ACTION

1. Claims 1 to 45 are presented for examination.

Information Disclosure Statement

2. The reference listed in the information disclosure statement submitted on 12-21-2004 has been considered by the examiner (see attached PTO-1449).

Allowable Subject Matter

3. Claims 1 to 38 are allowed.
4. The following is an examiner's statement of reasons for allowance: the instant invention is directed to a system that includes a master component, one or many slave components communicating through a guaranteed head two-wire interface wherein reliability data is received, transmitted or used for checking problems with a read operation. The prior art made of record teaches a master-slave communication device using a two-wire interface. For instance Dreps et al. (USP 6571643) one example of the prior art teaches a master device communicating with a slave device through a data bus and a clock bus; however, the prior art made of record, taken alone or in combination fails to teach or fairly suggest or render obvious the novel element of the instant invention. I.e., "an act of receiving reliability data from the slave component over the data wire; and an act of using the reliability data to determine if there is a problem with the read operation being performed on the slave component." The prior art made

of record also fails to teach or fairly suggest or render obvious the limitation of "an act of transmitting reliability data to the master component over the data wire."

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
